The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kuraishi et al.

Kuraishi et al teach a process for producing cheese using transglutaminase where the transglutaminase is added after curd formation in the amounts claimed (see entire patent, especially Example 1).

The claims appear to differ as to the surface area.

The claimed surface area would be inherent and/or obvious to that of Kuraishi et al as the same amounts and process steps are utilized.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

Art Unit: 1761

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Righi et al disclose cross-linking in cheese with transglutaminase.
